

## PI-VET: Powering the Innovation of VET (PI-VET)

### Sustainable Learning Canvases

Within the scope of the **PI-VET** (Powering the Innovation of Vocational Education and Training) Project, Cooperation Partnership co-funded by the Erasmus+ Programme of the European Union, we are pleased to share a collection of **Sustainable Learning Canvases** that seek to serve as a tool that vocational teachers and trainers can use, together with their learners and stakeholders, to address multiple and interrelated challenges of their learning communities, such as the exclusion of marginalised and disadvantaged groups, gender imbalances in the labour market, gaps in digital competences and skills for new green jobs.

The Canvases were designed to be used by VET providers to collaboratively create innovative sustainable curricula which embed inclusive, digital and green practices and a strategy to develop supportive ecosystems around them. The Canvases aim to represent the practical and easy-to-use tool for VET providers to apply the consortium's **Methodology for Sustainable Learning Programs** into their work and, therefore, to adopt more inclusive practices that serve the needs of diverse target groups, innovate their pedagogical approaches and learning materials, enhance digital competencies and skills for digital and green transformations, integrate environmental-friendly means of teaching and training, and plan the engagement of relevant stakeholders to create valuable ecosystems.

The tools are addressed to VET teachers and trainers but can be tailored to apply to any curriculum and are transferable to any other Education and Training provider. The PI-VET project consortium developed the Canvases through online co-creation labs with vocational educators and business sector representatives. Particularly, five co-creation labs were implemented in Bulgaria, Cyprus, Ireland, Italy and Spain, engaging 87 participants, such as vocational teachers and trainers, representatives of companies, business associations and policy-makers from the participating countries.

### Partners

The Consortium consists of five partner organisations from: Bulgaria, Ireland, Italy, Spain and Cyprus. The partnership covers a wide range of expertise in the fields of diversity, promotion and protection of human rights and equal opportunities, training and professional development, sustainable and green practices and many more.
